II. MINING AND RECLAMATION

1. Was the mine active during the past year? Yes ☒ No ☐

2. If active, how much ore or mineral was mined? 1,000 lbs.

3. How much new or additional acreage was affected during past year? NONE

4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

None New see #8
~~Maintained existing road to the property; Removed overburden to expose ore vein; lengthened cut, and mined ore found. Use of powder, shusher, molyer and 4x4 pickup truck use of compressor, and drill.~~

5. How much acreage was reclaimed during past year? None; work in progress.

6. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.

Reasonable measures will be taken to prevent undue erosion or unnecessary degradation of public or private lands. Any dumps created will be on a reclaimable angle, and in the cuts all overburden will be re-seeded so no erosion will occur.

7. What is the total disturbed acreage at years end? Not more than
One acre.

8. Briefly summarize mining and reclamation planned for the upcoming year.

Expand existing cuts and remove overburden to further develop
ore vein and mine ore found. Maintain existing roads (access roads
